## Roadway Conceptual Analysis

Orange County Chairman  
Richard T. Crotty

May 2003

District 1 Commissioner  
Teresa S. Jacobs

### Orange County Public Notice

The County Road 535 Roadway Conceptual Analysis (RCA) Study is now complete. The recommendations for improving a section of County Road 535 beginning just south of the Western Beltway and extending south approximately 3.5 miles, including a segment of Fiquette Road, have been approved by the Orange County Board of County Commissioners at a Public Hearing which was held on April 8, 2003. The Board approved the recommendations of the study and granted authorization to continue with the final design, right-of-way acquisition, and construction of the improvements.

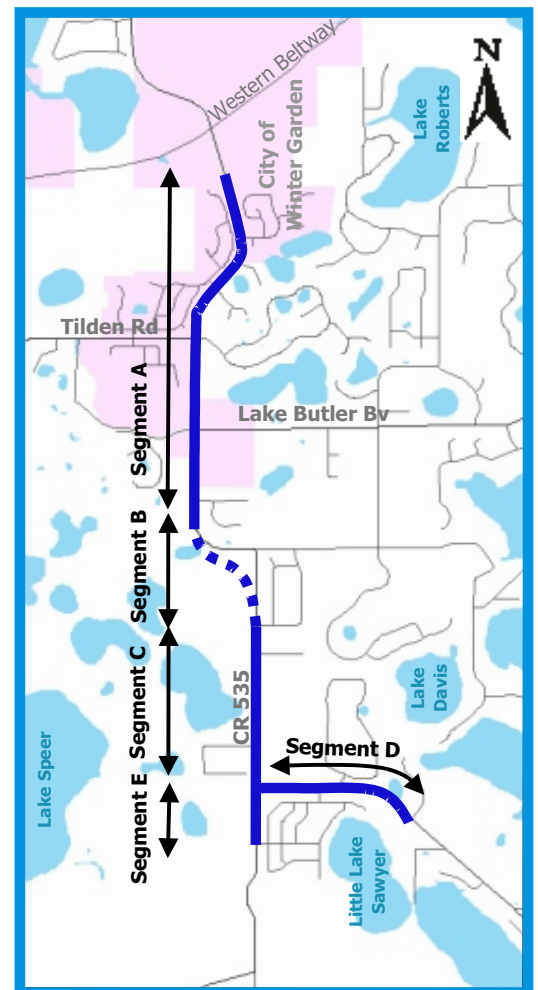

### Overview of the Study's Recommendation

The proposed improvements for this section of County Road 535 consist of widening the roadway from two to four lanes, in addition to providing a raised median that separates the vehicle travel lanes, a five foot sidewalk on the east side and a ten-foot multipurpose path on the west side of the roadway. The newly constructed roadway will also include landscaping, lighting and drainage improvements throughout the project limits.

### What's Next

Now that the RCA study is complete and a recommendation has been approved by the Orange County Board of County Commissioners, the next phase of this road improvement project will be to design the construction plans for the future improvements. Following completion of the final design plans, the additional right-of-way that is needed to construct the roadway improvements will be acquired. The final step in this roadway widening process is the construction of the roadway improvements. These future phases will be incorporated into the County's Capital Improvement Program (CIP). The schedules for each phase will be determined in conjunction with County's CIP and made available through a web site that will be developed for this project.
