

Art Glass in Orange County

College Park United Methodist

Map #17

Churches

Installed by [Smith Stained Glass Studios](#) when the church was built in 1966, a large faceted portrait of Christ greets visitors in the narthex and thin ribs of stained glass bring color all along the wall. They depict scenes from the life of Christ. Inside the sanctuary abstract faceted glass windows flank the sanctuary and a cross above the altar is also lit from behind its faceted glass face.
