

Horizon West Village Roadways

Preliminary Engineering Study

Orange County Mayor
Richard T. Crotty

March 2005

District 1 Commissioner
Teresa S. Jacobs

Preliminary Engineering Study Begins

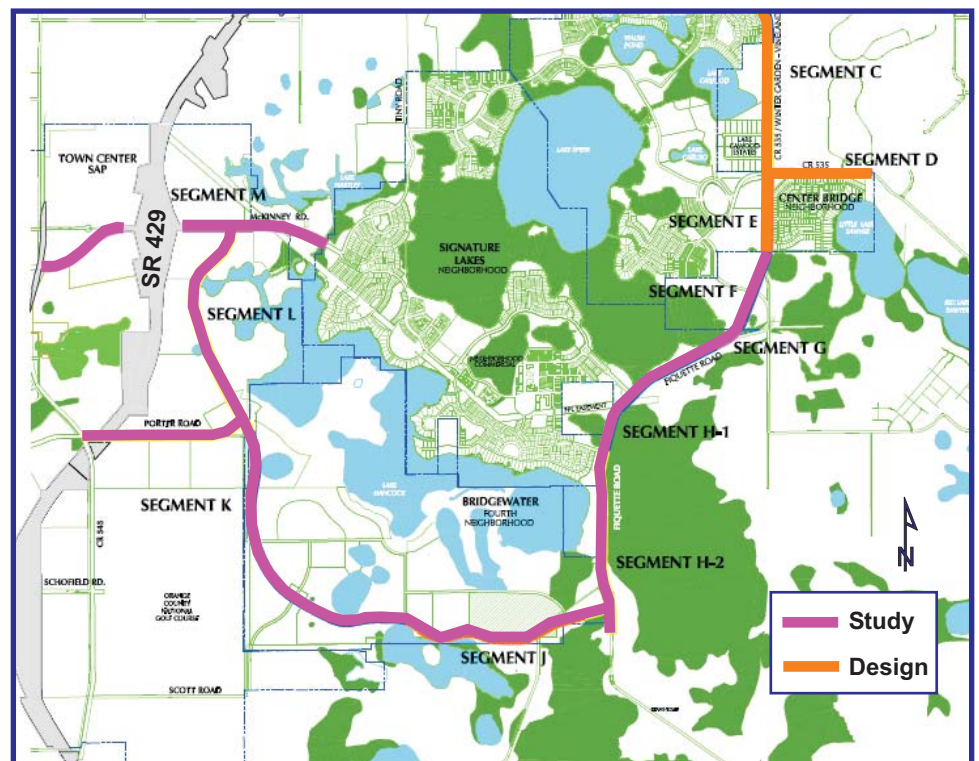

Orange County has initiated a Preliminary Engineering (PE) Study to improve Ficquette Road, Porter Road, Reams Road and McKinney Road within the Village of Bridgewater. The PE Study is a roadway development process tailored to evaluate the engineering, social, and environmental impacts of potential roadway improvements. The intent of this study is to identify and recommend the most appropriate roadway improvements to serve the area's increasing travel demands. Growth in Southwest Orange County is rapidly occurring and area roadway network improvements will be necessary. It is anticipated that travelers will experience increased traffic congestion and longer delays on the area roadways.

The types of improvements to be studied during the PE Study include the addition of travel lanes, realignment of roadway segments, signalization and intersection improvements, the addition of sidewalks and multi-use paths, roadway landscaping and other safety enhancements including roadway lighting and drainage improvements.

First Public Meeting Scheduled

You are invited to the Project Kickoff Meeting on Thursday, March 24, 2005 at the **West Orange High School located at 1625 South Beulah Road in Winter Garden**. The meeting will begin with an informal open house at 6:30 p.m. followed by a formal presentation starting at 7:00 p.m. The meeting will conclude with a question and answer session. You will have an opportunity to review aerial display maps of the study area, potential widening alternatives and other project materials. Orange County staff and members of the study team will be available to discuss potential roadway improvements and address project issues. Additionally, your input and suggestions regarding the PE Study will help determine the alternatives that will be identified and evaluated as part of this study.
