

Art Glass in Orange County

CNL II

Map #38

Public Art & Commercial Buildings

Included in the collection of art in the publicly accessible first and second floor lobbies is Spring Sea by Los Angeles based artist [Yolanda Adra](#). This wall sculpture of colorful abstract fused glass is composed of three sections. The various colors and textures were fused into each piece through a slow and technically sophisticated process of heating the various glasses and materials to around 1500 degrees. The expansion qualities of each segment need to be compatible so the glass does not break apart as it cool.
