

# ***FUTURE LAND USE and ZONING CORRELATION***

The following table shows the correlation between future land use and zoning. The Planning Division uses this correlation to determine consistency of land use activities with the Comprehensive Plan Future Land Use Map (FLUM). Land use compatibility; location, availability and capacity of public services and facilities; market demand; and environmental features also are used in determining which zoning district is most appropriate. Development activity within a land use designation is restricted to the maximum density and/or intensity allowed by the FLUM designation, regardless of zoning.

\* Rural Settlement only    \*\* Limited to 4 dwelling units per acre    \*\*\* Consistent with Comprehensive Plan Policy FLU6.2.3

Note: See FLU8.2.5, FLU8.2.5.1, and FLU8.2.5.2 to determine whether a rezoning is required prior to a special exception, or to determine whether a rezoning is required in specific cases of inconsistent zoning and future land use.

Note: Consistency of A-1, A-2 and A-R zoning districts with a **Rural Settlement FLUM designation** is limited to: residential uses permitted by right or by special exception approval; and, non-residential uses requiring approval by special exception and which are common to all zoning districts consistent with a Rural Settlement FLUM designation. A use that is not common to all listed districts is not consistent with a Rural Settlement designation.
