How much do you like the potential treatments? (1 is strongly dislike, 5 is strongly like)

How much do you like the potential treatments for Section 1 of Overstreet Road? (1 is strongly dislike, 5 is strongly like)

How much do you like the potential treatments for Section 2 of Overstreet Road? (1 is strongly dislike, 5 is strongly like)

How much do you like the potential treatments for Tattant Boulevard? (1 is strongly dislike, 5 is strongly like)

Do you have any final thoughts or comments for the Horizon West Traffic Calming Study?

Stop sign along Tattant. There is no stop of traffic from Fiquette all the way to past Middle School

Thank you for doing the study. It is much needed and the resolutions presented are great! I hope this happens soon.

The Curve on Overstreet is very dangerous. I have owned my home on Overstreet for 13 years and things are getting worse. It used to be quiet as I would sit on my porch, now I hear cars screeching their breaks. 20% homes-8 had to replace mailboxes

The straight away that encompasses the middle school on Tattant has a severe issue with extreme speeds and drag racing. More often at night time.

We need speed humps, medians with trees, and the houses need to be protected from oncoming cars. Pedestrians know it is just too dangerous to walk along overstreet

Thank you so much for putting all of this work into making our neighborhood safer!

Any improvements would be greatly appreciated.

How are these improvements paid for? In the past some of these fell upon those who lived directly on the street. How is maintenance paid for?

Very good study & public participation.

Do you have any final thoughts or comments for the Horizon West Traffic Calming Study?

These ideas are fantastic and I'm grateful for the work.

worried about crazy drivers and bike lanes. i see drivers passing in unsafe ways especially when delivery drivers stop in front of front loading homes on Overstreet

A lot of road noise happens due to acceleration. Roundabouts and chicanes would probably help reduce that substantially.

Thank you!
