Notes

- (1) Following satisfactory completion of the water supply and distribution system, and upon receipt of the applicable meter/connection fee, the Orange County Utilities Department (OCUD) shall furnish and install the necessary fittings, meter, and meter box at the property line. The owner or developer of the property desiring service shall bear the expense of the service lateral pipe of the required size, from and including its connection with a corporation stop at the water distribution main in the right-of-way to and including a curb stop at the property line. Service piping from the meter to the building is to be installed by and/or at the expense of the property owner or builder.
- (2) The OCUD shall determine the appropriate meter size for use by all its customers.
- (3) Does not include any cost associated with construction of a water lateral from the meter to the water main providing service; in the majority of cases, the developer constructs the lateral. In situations where the OCUD would be responsible for the lateral, the cost of the lateral would be charged to the customer on a time, materials, and pro rata overhead cost basis.
